

Mathematics

Grade Five - Unit 2

Essential Understandings:

- Decimal place value to the thousandths
- Decimal rounding rules
- Operations with decimals
- Multiplication standard algorithm
- Division strategies
- Rectangular arrays
- Area models
- Double digit divisors
- Common conversions
- Units with the two measurement systems

Content Vocabulary:

Place value
Tenths
Hundredths
Thousandths
Rounding
Concrete models
Properties of operations
Standard algorithm
Persevere
Viable arguments
Quantitatively
Array
Base-ten numerals
Compare expanded form
Multi-digit numbers
Multiple
Multiply
Number names
Product
Quotient
Reasonableness
Whole number exponent
Whole number
