

Mathematics

Grade Five - Unit 4

Essential Understandings:

- Unlike denominators
- Least common denominators
- Simplest form
- Equivalent fractions
- Process to convert mixed numbers to fractions
- Benchmark fractions can be used to assess the answer
- Number sense of fractions
- Estimation use with fractions
- Reasonableness of answers to fraction addition and subtraction
- Procedure to create a line plot including increments, labels, etc.

Content Vocabulary:

Denominator
Numerator
Equivalent
Mixed number
Line plot
Increments
Labels (for line plots)
Benchmark fractions
Unlike denominators
Visual fraction model
Equation
Data set
Estimate
Reasonableness
Improper fraction
Simplest form
Least common denominator (LCD)
Multiple
Factor
